

The DECIDE annual workshop “The assessment of imaging biomarkers for the early and differential diagnosis of Alzheimer’s disease” will take place in Paris on July 18th 2011 in colocation with ICAD 2011 (July 16-21), the world's leading forum on dementia research.

The workshop aims to present the prototype of an SPM-BASED application to analyze FDG PET/SPECT images on single cases to the reference community for the clinical validation of the DECIDE service. The workshop is by invitation only.
